

HARINI BANDA

SOFTWARE ENGINEER

PROFILE SUMMARY

- Results-driven software developer with strong foundations in backend engineering, backend development, REST API development, and application architecture, and object-oriented programming.
- Proficient in Python, Java, C, and C#, with hands-on experience building scalable applications using ASP.NET, Flask, and Django.
- Experienced in designing and developing RESTful APIs and implementing server-side business logic.
- Skilled in MySQL, relational database design, CRUD operations, query optimization, and enterprise data management.
- Strong knowledge of OOP, DBMS, Operating Systems, Computer Networks, and Software Engineering principles.
- Adept at debugging, application flow analysis, and collaborative development environments.

TECHNICAL SKILLS

Programming Languages	Python, Java, C, C#
Frameworks / Technologies	ASP.NET, Django, Flask
Backend Development	REST APIs, Business Logic Implementation, Application Flow
Database	MySQL
Tools & Platforms	Git, GitHub, SSMS, AWS (EKS), IntelliJ IDEA, Visual Studio
Core Competencies	OOP, DBMS, AIML, OS, Computer Networks, Software Engineering
Soft Skills	Communication, Teamwork, Leadership, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

1. Zapcom Group, Hyderabad

Software Engineer

- Developed practical knowledge in enterprise application development using C# and ASP.NET.
- Developed a Recruitment and Onboarding System.
- Designed and implemented RESTful APIs for candidates and onboarding workflows.
- Implemented Clean Architecture and CQRS pattern to improve scalability and separation of concerns.
- Strengthened skills in debugging and understanding application flow.
- Gained experience in database connectivity and backend logic implementation.
- Regularly shared progress updates and implemented feedback to improve deliverables.

2. S&P Capital IQ (India) Pvt Ltd, Hyderabad

Intern – Backend Developer

- Contributed to backend system development by debugging and maintaining services.
- Refactored tightly coupled code to improve modularity and maintainability.
- Wrote SQL triggers using SSMS for data integrity and consistency.
- Understood data lifecycle processes: Universe, Extract, Archive, and Distribute.
- Monitored backend jobs on AWS and observed workloads through EKS UI.
- Worked with Java, MySQL, and IntelliJ IDEA following backend best practices.

EDUCATION

- Vasavi College of Engineering, Hyderabad - B.E, Information Technology

CGPA: 9.16
